

2024.12.17 11:00 (Frankfurt time) --- d-p correlations within PHQMD

How it started:

Official production for BM@N asymmetric systems:

February 2024, PHQMD 4.1, $Ar+C$, $Ar+Al$, $Ar+Cu$, $Ar+Sn$, $Ar+Pb$, $E_{kin} = 3.2 \text{ GeV}$

Now:

Test production for my stabilization studies:

November 2024, PHQMD 5.2 MS, $Ar+Cu$, $E_{kin} = 3.2 \text{ GeV}$, kinetic deuterons are included, 2 recipes for stabilization
